# Incident management software

Risk Wizard's **new** fully web based incident system, RELIANCE, provides comprehensive end-to-end management of risk and compliance incidents, loss events, asset failures, audit issues, complaints, compliance breaches, control failures, and workplace events.

The user friendly system is flexible, scalable and suited to enterprise-wide deployment on your intranet/internet where people can log incidents as and when they occur.

Incidents are easily linked to risks, compliance obligations and controls to create a holistic governance model. With easy identification and analysis of process and cross process trends we create a pro-active rather than reactive approach to incidents, risks and compliance.

## Why Risk Wizard?

### Smart features

- Flexible incident framework
- Cause and effect analysis
- Corrective actions register
- Responsibility allocation and notification
- Extensive incident filtering
- Interactive incident calendar
- Individual & business area dashboards with drill down
- 3 level workflow escalation
- Workflow notifications with system hyperlinks
- Links to strategies, risks, controls, actions and compliance obligations
- File/URL attachments
- Unlimited actions/notes

### Immediate benefits

- No IT footprint
- No user resistance
- Identify and analyse trends
- Enterprise-wide incident logging
- Increased awareness and involvement

### System outcomes

- Consistency of process
- Performance reporting and improvement
- Improved communication and collaboration
- Security and access
- Responsibility and accountability
- Streamlined incident process

The incident system can be used independently or in combination with other Risk Wizard products to suit your requirements. Risk Wizard seamlessly integrates governance activities to save you time and money.

Call Risk Wizard for an obligation free demonstration.  
It could be the most important call you make all year.
