

Risk management software that's easy to use and sensibly priced

Flexible, off-the-shelf tool designed
to assess risks, monitor compliance,
log incidents and track action plans
from any desktop or portable device.

Our software
helps your business
move forward.

Saving you time and money

Risk Wizard is a leading risk management software tool that's quick to setup, user friendly, secure and affordable.

Easily tailor input forms, dashboards, reports and much more to suit your business. Excess time and effort spent previously on Excel or older systems is immediately freed up.

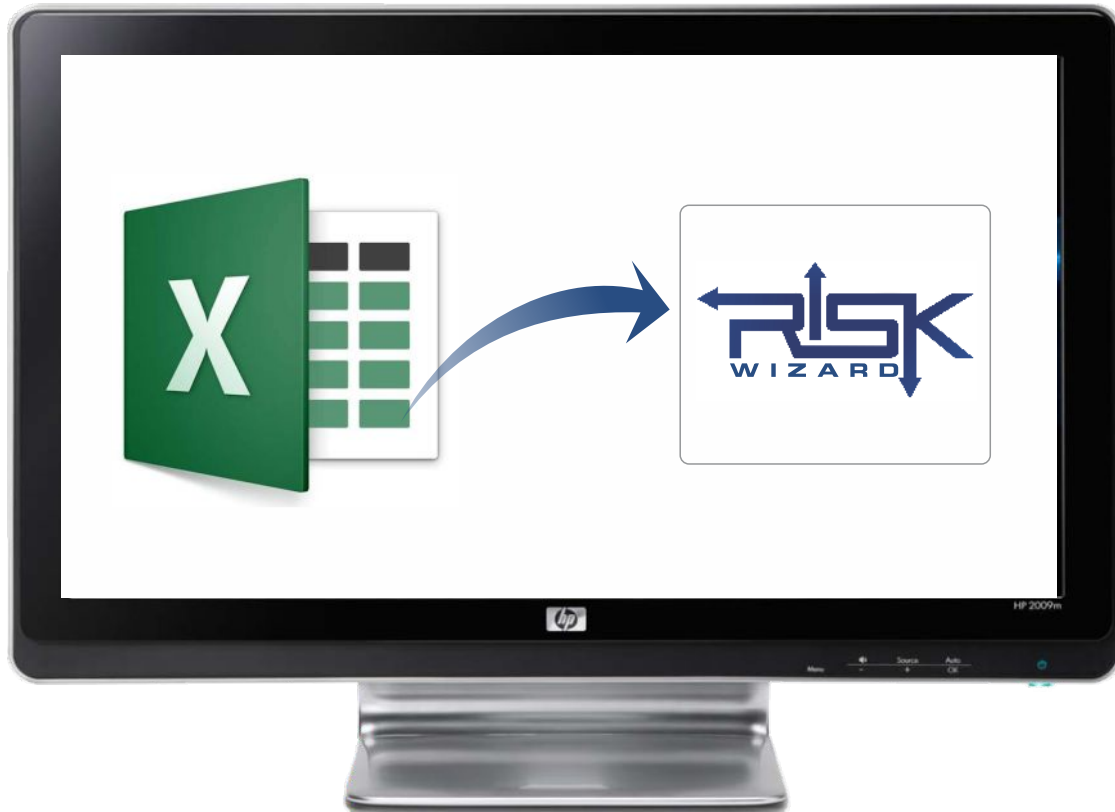

“It is clear that Risk Wizard will achieve our objectives and will facilitate risk analysis in our key decision making processes... it will allow ease of reporting to management teams, committee and the board and will demonstrate how Waypoint’s risk profile evolves over time.”

Bill Weston
Chief Risk Officer
Waypoint Corporate Services, UK

Outgrown Excel?

Whether you've outgrown Excel, replacing an old system or starting from scratch, Risk Wizard's transition path is quick, easy and affordable ensuring a seamless upgrade.

Spend less time and effort

- | | | |
|--|---|--|
|  Quicker to access
Rapid 'cloud-based' access 24/7 from desktop or mobile. |  Easier to manage
Simple to set up, run and control with automatic backups and upgrades. |  Better security
User access, system data, backup and storage are much more secure. |
|  More free time
Frees up time spent on spreadsheets or system workarounds. |  Greater confidence
Restores everyone's confidence in the reporting process. |  Less pressure
Relieves pressure from stakeholders as reliability improves. |

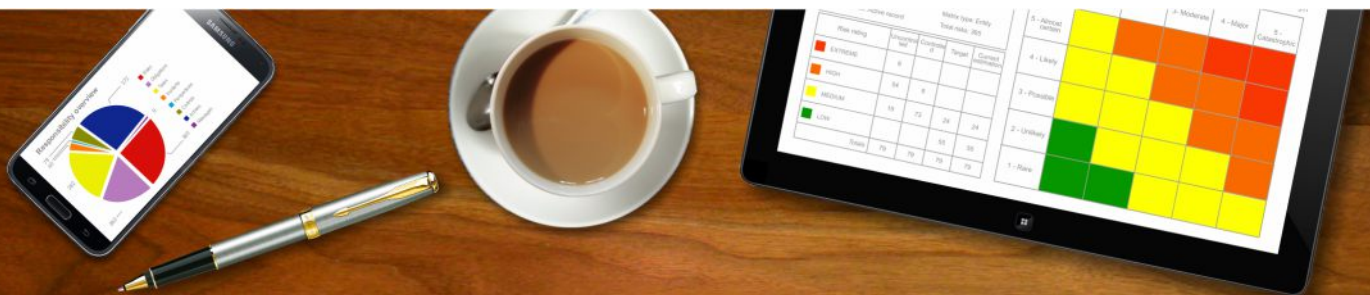

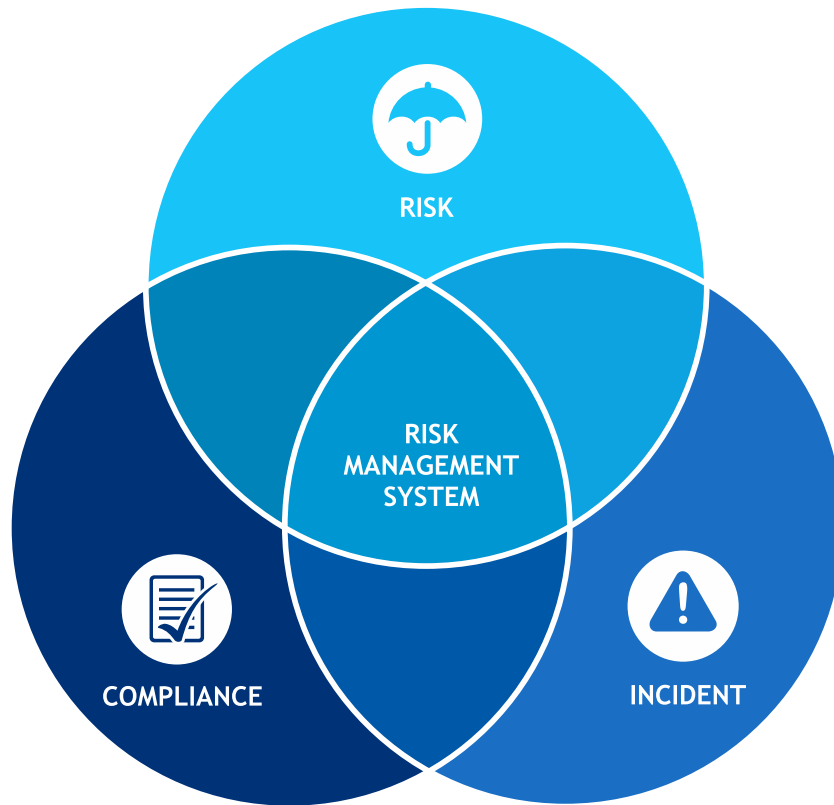

"Save the Children Australia chose Risk Wizard as its platform to manage its enterprise risks following a lengthy search for a system that best suited the needs of the organisation. Its simplicity has allowed Save the Children Australia to better capture, monitor and manage its strategic and operational risks. The service and support provided by Risk Wizard in the implementation phase was excellent, and the ongoing support and advice has reinforced what a good decision we made."

Stuart Adam
GM Risk Assurance
Save the Children Australia

Manage more than just risk

Our Risk, Compliance and Incident products when bundled together work as one total risk management system. They can also be bought individually or as a pair.

Flexible and quick to set up

Because it is so flexible, Risk Wizard can be used by individuals, teams or entire enterprises within any business or industry.

Quick to setup and easy to learn means that people begin profiling risks, tracking compliance and logging incidents in no time.

"In our line of business, we take performance based risk management very seriously. To create sustainable value we knew we had to integrate our risk management systems with our governance and control systems. The very professional team at Risk Wizard helped us every step of the way."

Keith Ketheeswaran
Executive Manager Risk & Compliance
GEO Group, Australia

What makes us different

User friendly

Our user interface is clean and modern, simple to navigate, quick to load and easily configured to your terminology.

Quick implementation

Our system is quick and easy to install, setup and learn so you're ready to start work in days not weeks or months.

Ongoing support

Our standard package includes phone, email and online support plus software updates and upgrades.

Flexible reporting

We include a range of template dashboards/ reports and you can design your own from scratch with our included builder tools.

Data Migration

We can transfer your data from Excel or an existing system into Risk Wizard so you can resume work immediately.

Sensibly priced

Our sensible prices means any organisation can obtain a solution that's affordable and great value for money.

"In our efforts to find the best data management and workflow solution for our ERM consulting clients, Risk Wizard quickly rose to the top. We have found it to be comprehensive, customizable, easy to learn and implement. It is definitely meeting our clients' needs, the cost is affordable, and Risk Wizard's staff have been very helpful and attentive all along the way."

Scott S. Wightman

Search Engine

Choose from a range of data filters and search preferences.
- 

File Management

Upload data files and attach links to stored documents.
- 

Linking Records

Create meaningful links between records to aid understanding.
- 

Terminology

Customise terminology to fit with organisational standards.
- 

Data Libraries

Create unlimited libraries to manage your knowledge database.
- 

Audit Log

Keep track of all changes made to a record over time.
- 

Online Help

Reinforce knowledge, find answers and keep up to date.

"Our integrated company-wide risk management approach was enabled by Risk Wizard. It provides an easy interface to identify, assess, monitor risks in our complex industry and provides all reporting information on the fly. Their support helped us through implementation and the further development of our risk management approach and provides an additional layer of security for our business."

Ali Parvin Hosseini
Risk & Compliance Manager
Telespazio VEGA Deutschland, Germany

Get started today

The only way to decide if Risk Wizard is the best choice for your business is to experience it yourself.

We'd be delighted to show you the software in person or online so you can see it in action.

Then you can try any or all of our software products in a free, private and secure cloud environment.

Prior to the implementation of Risk Wizard, the information we held about our control environment was limited. We had no means, other than through manual oversight, of ensuring that controls were assessed and regularly reviewed. This proved particularly difficult to address due to control owners working in different locations. Thanks to Risk Wizard our ongoing control self-assessment process is now highly efficient and effective."
